### UPCOMING DEADLINES

#### February 4

Abstract submission for ASE 2015. Visit [www.asescientificsessions.org](http://www.asescientificsessions.org) for more information. Accepted presenters are then eligible to apply for ASEF's Abstract Presenter Travel Grants in March.

#### March 1

Application for ASEF's Council Trainee Travel Grants. Contact [ckerr@asecho.org](mailto:ckerr@asecho.org) for application instructions.

## You Made a Difference in 2014!

By Tom Ryan, MD, FASE  
Foundation Task Force Chair

As this productive year ends, I offer you my deepest thanks. Your commitment to this impassioned community has given the ASE Foundation the means to support the field of echo in 2015 and beyond. From those that donated time via volunteerism to those that donated funding for the Foundation's initiatives, the supporters of the Foundation are active and have ensured that echo is continually advancing.

With that being said, I would like to offer the readers of this newsletter a challenge: together, let us make 2015 our most successful year yet. From providing scholarships and grants, to providing quality cardiac care to underserved populations, there is still work to be done within our field.

However, the Foundation and its supporters made great progress this year. We participated in two humanitarian events, spearheaded a summit to discuss the value of echo, disseminated crucial guidelines to echo labs, provided young professionals with the means to attend the Scientific Sessions, awarded a \$200,000 multi-year research grant to a team of scientists hoping to utilize echo in fusion with other imaging modalities, and raised nearly \$75,000 for future research funding through the 5th Annual Research Awards Gala. Thank you!

**In 2014, your commitment to echo provided our field with \$223,794.76 - 90% of our \$250,000 fundraising goal. Much of this funding was earmarked to unrestricted funding and this will be used to augment the funds in areas that were directly earmarked below.**

- You provided \$6,895 for support of multi-language document and poster translations of guideline documents, such as the new [Recommendations for Cardiac Chamber Quantification by Echocardiography in Adults](#).
- Providing care to those who need it most is important to you. You gifted \$10,213 that will support humanitarian efforts in 2015.
- As federal healthcare research funding dwindles, ASE members rose to the challenge of providing researchers with the funding they require. You donated \$78,056 - all of which will be allocated to providing echo researchers with critical support and resources.
- \$2,741 of your donations were allocated to provide international sonographers with training.
- You have given fellows and sonographers precious resources to attend the Scientific Sessions. Your donations of \$11,191.76 will support over 50 echo professionals with travel grants and scholarships to attend ASE's largest conference of the year, the 26th Annual Scientific Sessions in Boston.

## You Made a Difference in 2014! *continued*

- An incredible total of 2,648 people contributed to the 2014 Annual Appeal to advance echo. The average gift amount was \$59.
- Since ASE provides funding for the Foundation's operational costs, ASEF has been able and will continue to ensure that 100% of your earmarked donations go toward the initiative that you have chosen to support. **Every dollar raised through the Foundation's Annual Appeal goes directly back out into the field.**

Donors, volunteers, and all of those in-between: you are the reason that the Foundation is able to make a difference for echo. I believe that together we can make 2015 even more successful! Additionally, because of your assistance, we came closer than ever before to meeting our \$250,000 goal. ■

## Extra, extra! Read all about it! GUIDELINE UPDATES

An update of one of ASE's most cited and utilized guideline documents has been published in the January issue of JASE. [Recommendations for Cardiac Chamber Quantification by Echocardiography in Adults](#), led by Dr. Roberto M. Lang, is an update of the popular 2005 document. The ASE Foundation is currently partnering with physician volunteers for guideline translations in Spanish, Portuguese, Mandarin, and other languages, which gives clinicians across the globe access to these recommendations for improved patient care worldwide.

Not only does the availability of guidelines improve patient care, but it also ensures that standardization and consistency is a top priority in echo labs around the world. In 2014, you ensured that the Foundation will have funding in 2015 to translate and disseminate these critical documents to cardiac ultrasound professionals. Thank you for making patient care and standardization of practice a top priority of the ASE Foundation. ■

## A Sustainer's Perspective with Merri Bremer, RN, RDCS, FASE

*Never underestimate your ability to make someone else's life better – even if you never know it. – Greg Louganis*

**1. What encouraged you to become a monthly sustainer to the ASE Foundation? How can the ASE Foundation grow its number of sustainers?** Being a monthly sustainer is an easy and efficient way for me to support the work of the ASE Foundation. It definitely lowers the impact on my personal budget while providing the ASE Foundation with a reliable source of support.

**2. I see that in addition to cardiac sonographer credentials, you also have an RN. Tell me about your journey into cardiac ultrasound.** I started my nursing career in 1984 and discovered a lifelong interest in cardiology while working in the Cardiac Intensive Care Unit. In 1989, merging of hospital facilities created an opportunity for me to move to the Echocardiography Laboratory as an RN sonographer. I became credentialed within two years and began to participate in echo education and research. In 2000, I became the Quality Improvement and Education Coordinator in the Mayo Clinic Rochester Echo Lab and have continued in that role.

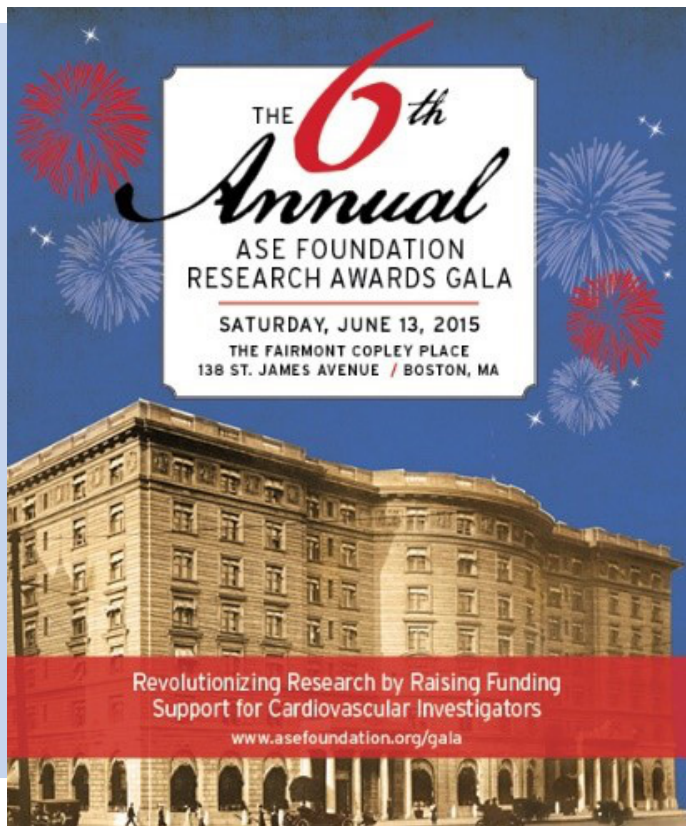

**3. How long have you been involved with ASE and/or the ASE Foundation?** I became a member of ASE in 1995. Since then, I have been privileged to participate in many ways. The ASE Foundation was developed while I was a member of the ASE Board of Directors. Because I believed strongly in the mission of the Foundation, I began to donate then and never stopped.

**4. How would you like to see the Foundation grow its initiatives in the future? Are there specific areas within the field that you think need additional support that the Foundation could offer?** As an educator, I am particularly interested in seeing more support for education of sonographers, both nationally and internationally.

**5. What motivated you to join ASE and become involved with the Society?** Early in my career, my mentor suggested joining ASE to provide an avenue for education and professional development. I've participated on committees, the Board of Directors, and as a speaker at the Scientific Session, and I've never been disappointed. ASE has played a huge part in my career.

**6. What is your ideal vacation and why? Warm. Why? I live in Minnesota.** ■

# Join the ASE Foundation in Boston for two special events during the 26th Annual ASE Scientific Sessions.

## Registration is Now Open for the 6th Annual Research Awards Gala - Purchase Your Tickets Before They are Sold Out!

Join the ASE Education and Research Foundation on Saturday, June 13 for its premier fundraising event of the year! Tickets are now available for the 6th Annual Research Awards Gala - hosted with a theme of "Revolutionizing Research" and to be held at the Fairmont Copley Place in Boston during the ASE 26th Annual Scientific Sessions.

Along with an evening of fine dining and dancing, the Gala will also celebrate the accomplishments of awardees and the dynamic field of cardiovascular ultrasound. By purchasing tickets to this event, you will be directly supporting echo research funding and the continued advancement of our field. Additionally, a portion of all Gala tickets are U.S. tax deductible. All prior Galas have sold out; [purchase your tickets today.](http://www.asefoundation.org/gala) ■

## Have fun for a great cause! Explore Boston During the Healing Hearts Scavenger Hunt

*Tickets are limited, purchase yours today when you **register** for the 2015 ASE Scientific Sessions!*

The ASE Foundation will be hosting a one-of-a-kind philanthropic team-building event to encourage Scientific Sessions attendees to explore the historic diversity and magnificence of Boston, Massachusetts.

ASEF's Healing Hearts Scavenger Hunt will take place from 6 pm - 8 pm EDT on Sunday, June 14 in and around Boston's historic landmarks. Scavenger Hunt attendees will explore Boston by foot in teams of 8-10 people. Teams are provided with tote bags, team lists, maps, pens, use of digital cameras, and the opportunity to network with friends and colleagues in a heart-healthy and fun way. The teams with the best picture, highest score, and a few other exciting categories win prizes. Recruit your own team members, design your own team tee-shirt or dress up to bring your team's competitive spirit to the Foundation's Scavenger Hunt! The start of the Hunt will be located within walking distance of the Hynes Convention Center and will conclude with additional networking opportunities.

*Disclaimer: This event is sold by individual ticket and is limited to the first 200 participants. ASEF encourages you to coordinate with*

**SIEMENS**

*your team members prior to the commencement of the Scavenger Hunt. Teams must be self-organized and attend the event with teams pre-formed. If you don't have a team, that's okay too, you will be assigned onsite. After you register, ASEF will provide you with a forum to discuss the event and team information.*

This event is supported with funding from **Lantheus Medical Imaging, Inc.** and **Siemens Healthcare**. Proceeds from the Scavenger Hunt will be donated to the ASE Foundation for educational scholarships and travel/research grants. The \$40 ticket price for event admission counts as a donation to the ASE Foundation and is U.S. tax deductible. Thank you for making a world of difference for echo in 2015! ■

# A Sustainer's Perspective with Steve Amato, RDCS

*“Service to others is the rent you pay for your room here on earth.”*

*- Muhammad Ali*

## 1. What encouraged you to become a monthly sustainer to the ASE Foundation? How can the ASE Foundation grow its number of sustainers?

I became a monthly sustainer after attending Echo Florida 2014. Although I had been a member of the ASE since 2010, I really didn't know too much about the ASEF. At the conference, I spoke with a few ASE staff members who told me about volunteer opportunities and how to become more involved. When I got home from the conference, I read a lot about the great work that the Foundation did with members' contributions. It was then I decided that I wanted to become more of an active member, in particular, a monthly sustainer.

I think the ASEF could raise its numbers of sustainers simply by showing its members that amounts given can be as little as \$10 per month and those members can give as much, or as little as they want, depending on their financial situation. As an example, when I was considering donating on a monthly basis, I thought the Foundation had a minimum or a “suggested” dollar amount that a member should donate. I was pleased to hear that any amount donated is appreciated. No one wants to feel pressured into giving a “suggested” amount, and the flexibility of contributions was a great selling point to me.

## 2. Tell me about your journey into cardiac ultrasound.

My journey into cardiac ultrasound started in 2008 when I was laid off from a financial services job that I had been in for the previous 12 years. This lay off was a blessing in disguise, as I was feeling a bit burnt out in the investment field from working long hours, including some weekends. I always had an interest in working in the medical field, but wasn't sure what I really wanted to do there. I wanted a career that would not only challenge me intellectually, but also one that would enhance my attention to detail skills. As I was working in a contract position shortly after being laid off, a colleague who I just met mentioned that his wife was a cardiac sonographer and told me how she really loved it. I job shadowed her and instantly knew that cardiac sonography was the career I wanted to pursue.

## 3. How long have you been involved with ASE and/or the ASE Foundation?

I have been a member of the ASE since I was a student at Bunker Hill Community College in 2010. I recently became a monthly sustainer in the fall of 2014.

## 4. What motivated you to join ASE and become involved with the Society?

I was motivated to join the ASE by my sonography teacher at Bunker Hill Community College. As a student, I didn't know anything about the society, but my teacher encouraged us to join the ASE as students. She said it is a great resource for everything relating to echocardiography, that it would be a central (cyber) place to go to for learning and advancing our careers. This is an understatement. The Society has become invaluable to me as a “newer” sonographer here at Massachusetts General Hospital. Since I started at MGH, seeing how many sonographers and cardiologists are members of the ASE has proven to me the Society is not only a smart yearly investment, but one that I believe a sonographer shouldn't do without. I am constantly on the website, reading the blogs and learning new things from my colleagues in sonography around the world.

## 5. What is your ideal vacation and why?

My ideal vacation would be to travel around Europe for a month by train. I love history, especially military history, so seeing places like Germany, Italy, and France would be great. I would not only like to see the major cities in these countries, but also the “out of the way” places where well known battles took place.

### ASE Foundation Mission Statement:

The ASE Foundation provides support for education, research, quality improvement and professionalism for ASE members and the larger community of healthcare providers, and patients for whom cardiovascular ultrasound is essential.

As a 501 (c) (3) non-profit organization, contributions made to the ASE Foundation are tax deductible to the fullest extent of the law.

## A partnership with the

# ASE Foundation

For over 60 years, Hitachi Aloka Medical, Inc. has led the medical industry by pioneering ultrasound systems that have advanced the standard real-time imaging. We design and develop innovative consoles, transducers, and software that are used to help medical professionals deliver proactive solutions to diagnose and treat patients and deliver the best patient care possible.

**HITACHI**  
Inspire the Next  
**ALOKA**  
illuminate the change

### **By giving back:**

Hitachi Aloka focuses on the personal aspect of prevention, diagnosis, and treatment of cardiovascular disease. One way we have become involved is by providing ultrasound systems and support for the ASE Foundation at the Care Harbor LA Clinic event this past year. We teamed up with the ASE Foundation to support them in their first domestic humanitarian mission and it was a great success.

A caring team of physicians and technologists using Hitachi Aloka ultrasound systems provided echocardiograms to 56 patients that otherwise may not have had this care. This is an example of how Hitachi Aloka is proving that providing advanced and high performance imaging quality and analysis tools for the prevention, diagnosis, and treatment of cardiovascular disease is our personal mission.

*"It was incredibly helpful to have Hitachi Aloka provide the use of their echocardiography systems and support for the Los Angeles Care Harbor volunteer event. Our cardiology specialists were more able to effectively triage patients who often have difficulty accessing standard patient care systems. By having this resource we could either provide reassurance to our patients or more appropriately expedite continued cardiology care."*

### **-Tracy Lawrence, MD, FASE**

Director of Echocardiography Services & Cardiac ECG/Stress Lab, LAC + USC Medical Center, Interim Director of Echocardiography Services, CardioVascular Thoracic Institute and Keck Hospital of USC Assistant Professor of Clinical Medicine, Division of Cardiovascular Medicine, Keck School of Medicine of USC

### **By looking forward:**

Increasing patient volumes is a reality in the Value Based healthcare environment today. We understand that you are personally dedicated to providing the best diagnosis for your patients. At Hitachi Aloka, we are committed to delivering the latest innovations in cardiovascular diagnostics so that you can give each patient your personal attention and care.

Since time with your patients is valuable, it is important to have tools that give you the most information in the least amount of time. Novel innovations that may provide information without additional procedures for TDS patients, eliminating beat-to-beat variation issues by using a single heart cycle to collect data, and new ways to evaluate hemodynamics are our ways of helping you move forward.

## 2014 Biggest Heart of the Year

We also would like to take a moment to thank our Biggest Heart of the Year: Jose Banchs, MD, FASE. Dr. Banchs' involvement in the Foundation's Task Force, willingness to serve as one of the first Gala Table Captains alongside of Dr. Vera Rigolin, and generosity towards ASEF demonstrates his commitment to philanthropy. Dr. Banchs, thank you for your support. Your dedication makes a positive and impactful difference for the future of echo. ■
